

Services

Postural Innovations are a team of neurological physiotherapists providing postural assessment and recommendations for bed positioning.

We are also able to assist with seating assessment and prescription, and provide education in the field of postural management.

TRUNK SUPPORT AND E BLOCK LEG SUPPORT

T BLOCK LEG SUPPORT

Simple stuff works

Postural Innovations is the Australian distributor of the Simple Stuff Works range. The sleep system can provide a high level of support for individuals with complex needs, using easily positioned brackets and supports with a thermoregulating overlay. A broad range of options are available including lower limb and ankle supports.

For more information about the range of Simple Stuff Works products we supply, visit our website at pinn.com.au

Positions adopted in bed can be potentially harmful and cause further disability. Are the covers hiding issues which need addressing?

Postural Innovations offer unique solutions for 24 hour postural management.

Our devices are specifically designed to help restore symmetry, reduce secondary complications and optimise function.

MODULAR SIDE LYING SUPPORT SYSTEM

Product benefits

- Reduce neurological influences such as spasticity and involuntary movement
- Improve skeletal alignment, preventing joint contractures and deformity
- Reduce pressure injury risk
- Improve internal system functioning (respiratory/digestive)
- Improve comfort and manage pain
- Assist sleep and manage fatigue

Product range

We prescribe, manufacture and supply high quality postural support devices in a range of sizes.

We are able to customise or custom build items to meet an individual's unique needs.

For more information on our full range of products visit our website at pinn.com.au

T block

For individuals who have a tendency to cross their legs (hip adduction).

F block

For individuals whose legs tend to move toward one side (wind sweeping).

E block

For individuals whose legs tend to move out to the side or require greater support.

Side sleeper

For individuals who require support and stability in side lying.

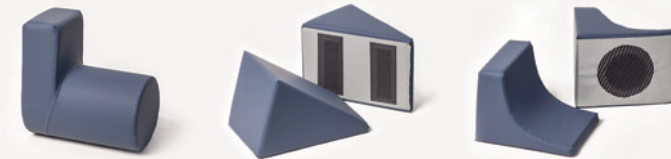

Trunk support

Trunk supports can assist scoliosis management in lying and sitting.

Modular side lying support system

Postural Innovations have designed a modular system using a combination of different shapes enabling full or 30 degree side lying. This is ideal for individuals with scoliosis, pressure care or respiratory issues.

L BLOCK

SIDE LYING SUPPORTS

TRUNK SUPPORTS

Quality of manufacture

All Postural Innovations products are made from the highest quality Dunlop foams covered in two-way stretch, breathable, waterproof polyurethane fabric. For optimum hygiene and infection control, products are fully sealed to ensure they are impermeable to body fluids.
